About This Game

Long Night: Alone I break is the first episode of a three episodes season. The next episodes will be released in the next few months

Concept

Long Night is a Third Person Survival-Horror video game series which aims to reconnect with the atmosphere of its ancestors, the old classics from the 90's and early 2000

With this game Trickster Face wants to put Lurking Fear back to the center of the gaming experience, rather than pure action sustained by an escalation of noisy special effects.

Here we have no shot guns nor giant monsters, but simply David, a youngster who can only count on your pugnacity and your instinct, to survive, and save his friends.

Synopsis

This black tale takes place in an American holiday camp next to a forest, at the end of a summer in the nineties. The heroes are a group of four teenage friends, accustomed to meet there every year. Spending their last evening together telling horror stories for fun, they find themselves plunged into a nightmare, bringing their most secret anguishes to life, tormenting them. All of a sudden everyone is on his own. During the night David will try to find and help his friends, but doing so, he will have to face worse than the fear that pursues him.

Features:

- Take control of your environment, keep the balance of your mental state to run and hide from your nemesis
- Resolve enigma to understand the intimacy of the 4 teenagers and become the wall between them and their fears.
 - Explore Long Night camp to discover great side quests, giving better understanding of the background.
- Choose to play with Old School (without checkpoints and interaction icons) or Modern Gameplay (with all the help you want)

Warning:

Long Night is rated 17+ M for mature by ESRB for the following content

Violence
Blood
Sexual Themes
Nudity

Title: Long Night
Genre: Action, Adventure, Indie

NICE GAME !. Not the best game ever made, but you can have loads of fun with it - If you like Indiana Jones and LEGO this will be a blast. Even though it could use some patches to correct a bug or two, the gameplay is still pretty good. I recommend it!. While writing this, I've put in less than 5 hours, however... I can tell i'm going to sink in too many hour in this game, even before it's finished. And once it does finish, I'll sink that many more hours in. Excellent game even in an early state. I highly recommend it.. This game could give a pleasing experience if you somehow succeed to clog your ears up for the incredibly dull plotline and the obnoxious voice acting. Ragdoll is great though.

I only recommend it to those who can't afford the real gem in this genre - XCOM.. I'm giving this game a negative review because of the short play time. It's not really even a game, it's more like a mini game. I'd expect a hell of a lot more for 20\$. Five hours from start to finish and the ending was underwhelming to say the least. The game was cute but became repetitive quite fast, but I could forgive the repetition if there was more to the game.. This is actually a really cool game. It works like Limbo but with really cool music. You can actually play based on the beat of the song. 9/10

<https://www.youtube.com/watch?v=4joeakhtoXw>. Flat out awful game. I can't find a single positive in this game. Don't buy

So this is still probably my favorite VR application.

The one thing I will say is, with the new update you added a wall that stops the particles from flying away.

I don't like this and there should be an option to switch back to the old version (without invisible particle wall).

I liked being able to send my particles flying way out into space.

I feel constrained in a box now instead of feeling like I was in infinite space.

Love the game still. Worth the \$5.

But please get rid of the invisible particle wall so that the sandbox is infinite like it used to be.

Makes no sense to have the particles stop at an invisible boundary.. "in Space" is a very simple retro space shooting game.

The graphics are extremely basic (even more basic than Space Invaders).

You fly a spaceship, trying to shoot all of the enemy spaceships and asteroids which are approaching from the right side of the screen.

It's not a particularly thrilling game; I'm guessing that it's probably aimed at those who want a bit of nostalgia in their computer gaming.

However, I do like the difficulty settings. Players can choose Normal, Hard, Very Hard, or Bonkers (that's a nice little touch of humour in the last-named setting).

There's not many reasons to recommend this game. A yearning to play retro games is about the only reason I can think of for people wanting to play it - if so, then good luck to them, and I hope they enjoy it.

However, despite the retro reason for its existence, I can't recommend this game in good conscience.

I didn't particularly enjoy it, and I'm guessing that most other people wouldn't either.. nice game, really funny story.. Bought this game on sale for less than \$10 and I can not say it was worth it. Given the game is out since early Dec 2016 would think that in 6 months time it would be further along. Still it is rather empty and boring. Set to easy I only encountered on AI with a shotgun easily took him out. Then it was a lonely world. Found another island and still falling asleep.

On Normal difficulty AI with handgun is easy to take down unarmed. If you can pick up his gun is a crap shoot as you can not find it in the thick bushes. Guy with the assault rifle seems to be able to see through the brush to kill you before you can get to a point where you see out the bushes.

I will not recommend this game at this time. I understand very well its EA and a WIP but the Progress does not seem to be far along. Substience is another EA of the same type and that game is moving along well. More to do more danger to avoid. So even try to say this is a one man Dev.....that does not fly as Substience is also one man.

I gave my opinion here its up to the reader to choose what to do with my opinion.. I met the creator of this game at a conference last year, played a few levels and was immediately taken with the simplicity, challenge, and general aesthetic.

I'll say here what I said to him then: this game is worth way more than one dollar.. This game was really short but it was a good time waster. I'd give it a solid 6.. I like this game, it's like Five Nights at Freddy's, but you can actually move around freely. A must-buy for horror fans!. Horrible game. Tower defence with shoot em up elements? Not true... Its a shoot em up (a really simple and bad one) with tower defence elements... If u can buy the towers... u need a lot of money, and u need to click on them dozen of times to buy one... and, towers are not really usefull...

Well, i paid 0,50 for it, but... its a BAD game, even for free. I have played MUCH BETTER games for free.... Never before have I experienced the terror of a minimum wage job. The sole man who lives in this facility (he is very ugly and orange) accosts me constantly for more toilet paper. I can't seem to find any around the level and when he catches up with me he is quite cross. He makes frustrated grunting noises, which is the only clue that he may need to relieve his bowels soon. I AM SORRY ORANGE MAN

SYMPATHY 10/10. Watched it a few times since the release, it was OK i guess.
